#welcome

Congratulations! You have successfully created a new Twitter developer account. With this account, you now have access to new APIs, app management, and tools to facilitate and support development.

Below are a few steps to help you create an app and get up and running with the new premium APIs.

If you're planning to use our standard APIs instead of our premium APIs, simply follow the steps below to create an app, then refer to the Getting started guide in our documentation for next steps.

Email confirmation, then success!
Note: This should happen right away. If not, then you have likely made a mistake somewhere and need to try again.

Next Page: create an app and get access keys

Create an app and get your access keys

App name (required) ⓘ

CS581HW7

Maximum characters: **32**

Application description (required)

Share a description of your app. This description will be visible to users so this is a good place to tell them what your app does.

Assignment 7

Between 10 and 200 characters

Website URL (required) ⓘ

https://stevens.edu

Tell us how this app will be used (required)

This field is only visible to Twitter employees. Help us understand how your app will be used. What will it enable you and your customers to do?

1. I plan to analyze tweets for a course assignment
2. I plan to look for tweets that use a certain specified keyword
3. There will be no interaction between me and other Twitter users. I will not tweet, retweet or like any Twitter content.
4. I will not display twitter content anywhere. I will only use it offline for my assignment|
